Top Skills

Spring Boot
REST APIs
Core Java

Certifications

Introduction to SQL
Prompt Engineering
Python 101 for Data Science
CSS(Basic)

Akancha Rani

MCA Student @ LPU | Aspiring Software Engineer | Java • Spring Boot • Backend Development • REST APIs • MySQL • Data Structures & Algorithms
Phagwara Tehsil, Punjab, India

Summary

Hi, I'm Akancha Rani. I'm currently pursuing a Master of Computer Applications (MCA) at Lovely Professional University with a strong passion for Software Development, Java Backend Development, and Problem Solving. My journey into software development began with a curiosity about how real-world applications are built. Today, I'm focused on strengthening my technical skills by developing backend applications, solving Data Structures & Algorithms problems, and building projects that address practical challenges.

Here's what I'm currently working on: # Java Development: Building scalable applications using Java while strengthening my understanding of Object-Oriented Programming and clean coding practices. Backend Development: Developing REST APIs and backend systems using Spring Boot, MySQL, and Maven. Data Structures & Algorithms: Regularly solving coding challenges on LeetCode to improve logical thinking and prepare for software engineering interviews. Projects: Building applications like SmartDocAI, a technical documentation management system developed with Spring Boot, REST APIs, validation, and database integration. Continuous Learning: Expanding my knowledge in software engineering, backend technologies, databases, Git, and modern development practices. I believe every project and coding challenge is an opportunity to grow as a developer. My goal is to build reliable software, write clean and maintainable code, and contribute to impactful products.

Portfolio:<https://akancharani.github.io/Portfolio/> GitHub: <https://github.com/AkanchaRani> I'm actively seeking opportunities as a Java Developer, Backend Developer, or Software Engineer, and I'm always open to connecting with developers, recruiters, and technology enthusiasts.

Experience

Helioustin.io
Project Manager
June 2026 - August 2026 (3 months)

Education

Lovely Professional University (LPU)
Master of Computer Applications - MCA, Computer Science · (2025 - 2027)

Ranchi Women's College
Graduation , Bachelor of Science in Mathematics (Hons.) · (July 2021 - August 2024)
